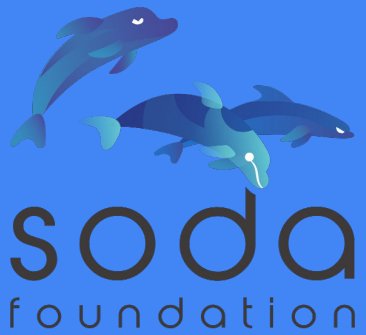
Connecting platforms , SODA and community!

Jalmeen Kaur Sethi (Joy)

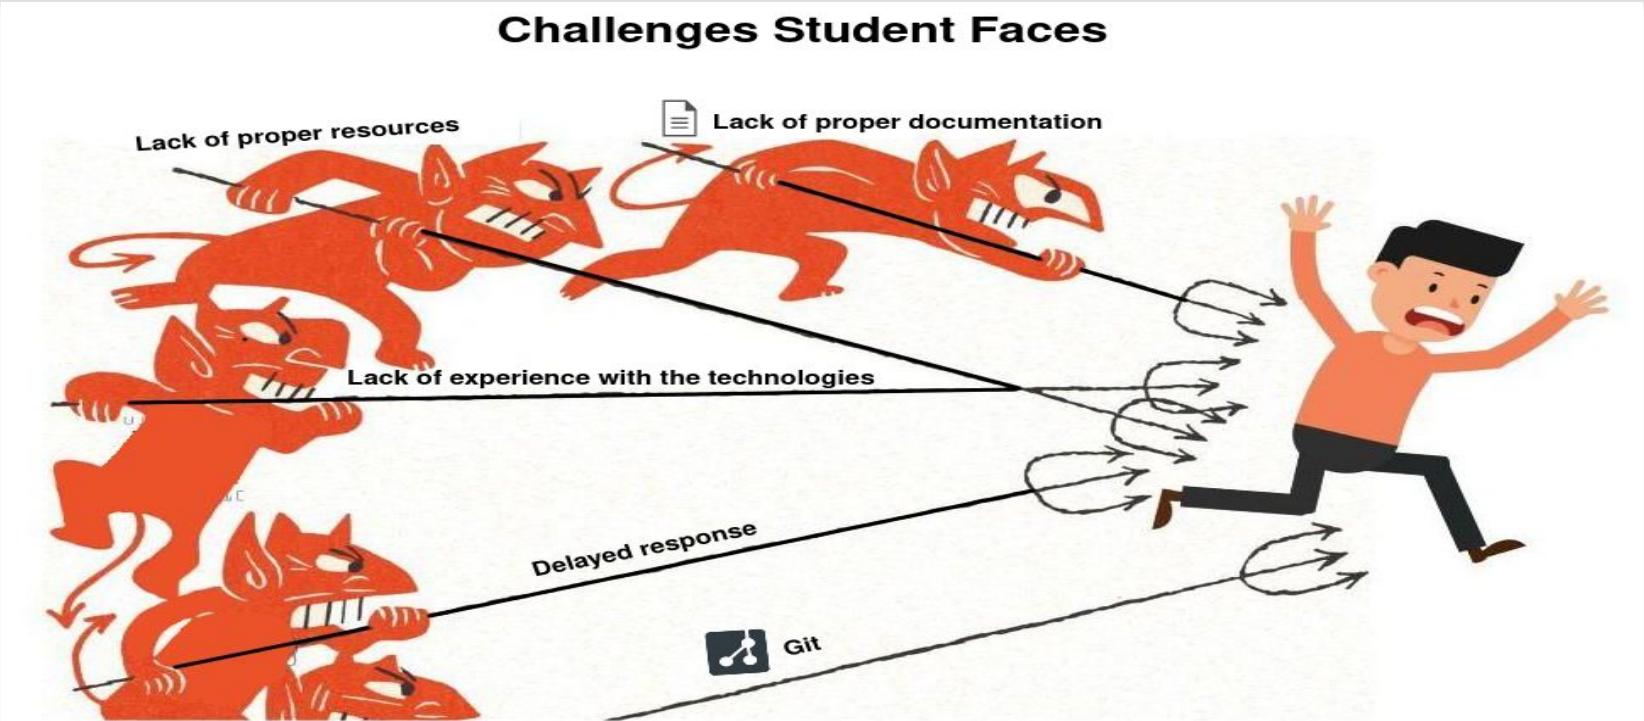
(Team Osive, SODA Student Contributor, George Brown College, Toronto)



Team Osive Journey with Soda

- Met Sanil Sir and Soda Team at Kubecon in February 2020
- Started attending community meetings and mentoring sessions
- Participated in Student Panel for Open Data Autonomy Meetup
- Currently working on SODA Home Lab Setup

Open Source Contribution common barriers



Approach - Other Students VS Team Osive

VS

7 Day Weight Loss

Martial Arts

soda foundation

Student Contribution (How and Why)

How a **no named college** (tier 2 and tier 3 college) student can contribute to a open source project

Why a student should contribute to Open source?

Knowledge

Mental Health

Networking

Personal Profile

soda foundation

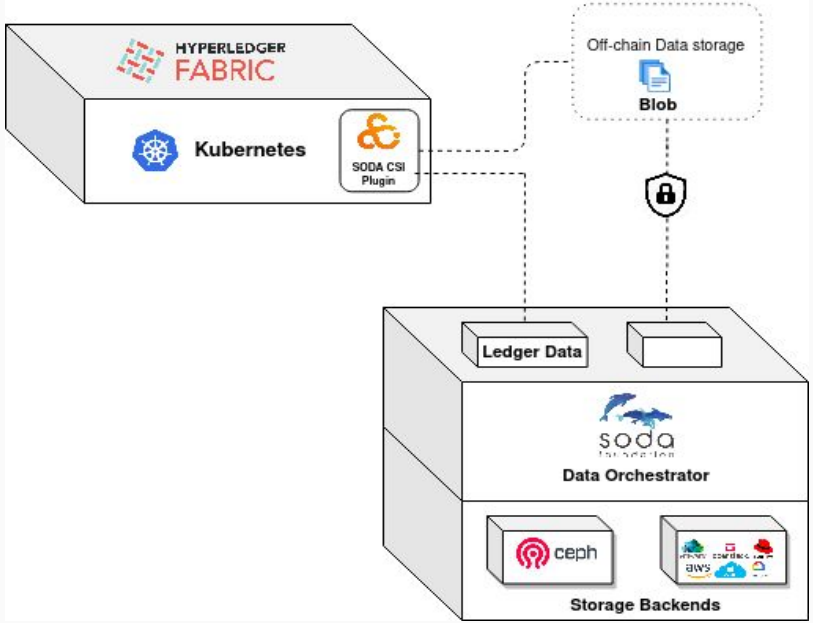
Currently Working on

SODA Home lab setup

SODA as a storage back-end for Kubernetes

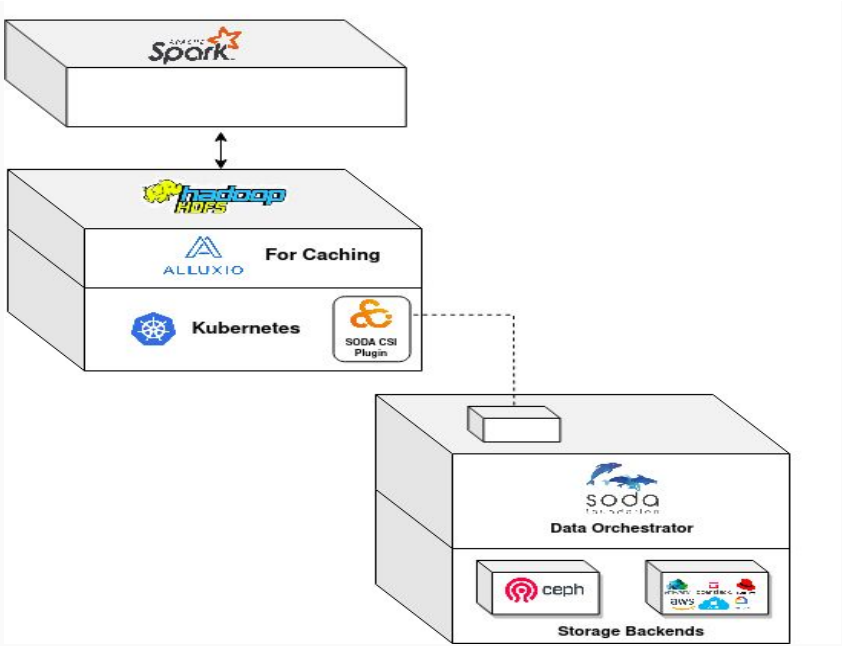
Future Tasks

Hyperledger Fabric on Kubernetes and SODA as a storage for Off chain data



Future Tasks

Running Spark queries on Hadoop running on kubernetes and using SODA as storage provider for HDFS



Hardware Infrastructure Availability

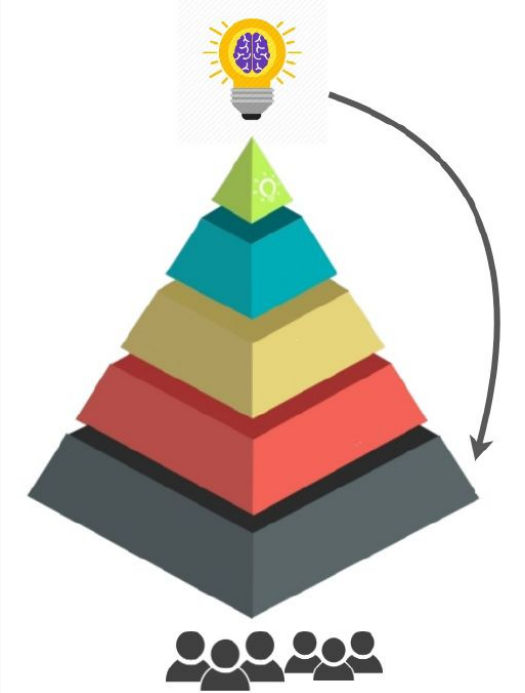
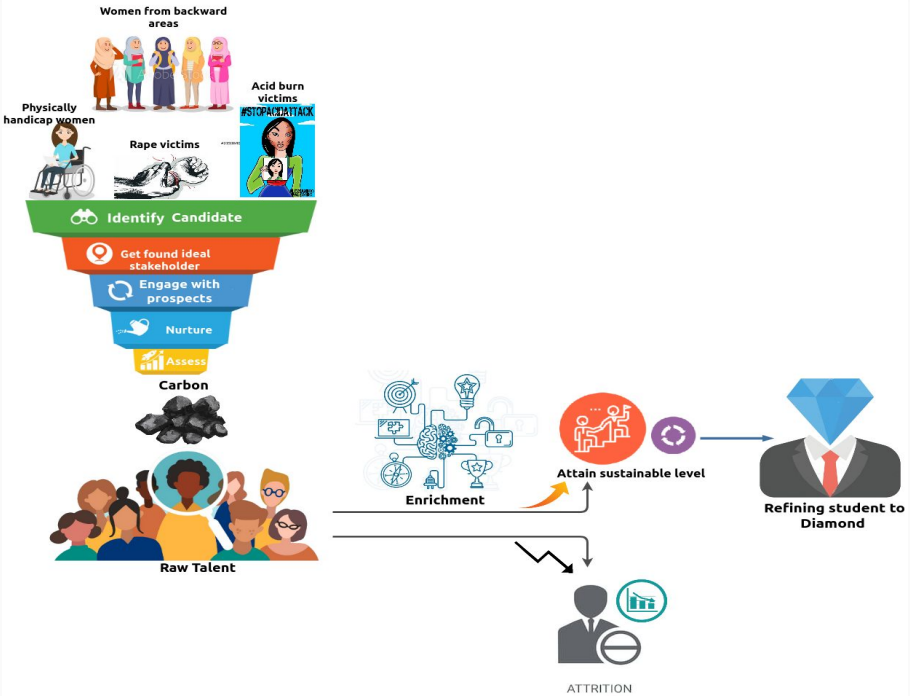
Osive - grassroot level initiative which strives to achieve goal of :

- Bringing Top of the pyramid knowledge to bottom of the pyramid students
- Filter raw talent, enrich students with core technical knowledge & refine them to Diamonds





Videos - having fun in Dojo
